

## P1 / 8M 2P Two plates manual heat press

### *Manual heat press for transfer applications, with magnetic closure system and automatic release*

Presents the same characteristics of its sister model P1/8, with the exception of the double lower plate. Designed for a higher productivity cycle and for a higher comfort. Thanks to the double lower plates, it's possible to place your t-shirt on the plate, while you are drying a second t-shirt on the other plate. The pressure strength is easily adjustable for both plates and you can have two different settings, according to your needs.

Heat is constant and flows equally through the surface of both plates, granting the best results while drying your products. Power consumption is also reduced thanks to a microcontroller that monitors the temperature and heats the plate only when necessary.

#### AVAILABLE MODELS:

##### **P1/8M - 2P (t-shirt)**

1 Teflon heat plate and 2 silicon rubber lower plates  
Size is **38x40 cm** standard, or **50x60 cm** optional

##### **P1/8M - 2P (caps)**

1 Teflon heat curved plate with and 2 silicon rubber lower plates. Size is **15x7 cm** standard (variable size)

#### TECHICAL DATA :

- Digital timer and digital temp. control ;
- Acoustic signaler and automatic release;
- Maximum Timer: 999 sec
- Max pression while closed 300 g/cm<sup>2</sup>
- Pression regulation
- Maximum power consumption: 230 V / 1400 W
- Power: 6 A
- Max Temperature : 200°C
