

P1 / 8

One plate manual heat press

Manual heat press for transfer applications, with magnetic closure system, and automatic release

20 years of experience, engineered and built into P1 / 8. It's The ideal model of heat press for screen printing, digital printing and transfer applications.

Light but robust design, it's easily usable by anyone, thanks to the assisted lever. The heat press is capable of a high pressure, which can be easily adjusted according to your needs.

The press is coated in teflon which grants you quality and eliminates the issue of polishness in the heated materials. The heat is constant and flows equally all over the plate, ensuring the best results in transfer application

Power consumption is also reduced thanks to a microcontroller which monitors the temperature and heats immediately only when necessary.

AVAILABLE MODELS:

P1/8 (t-shirt)

Heat press with teflon plate and a silicon rubber lower plate.

Size is **38x40 cm** standard or **50x60 cm** optional

P1/8 C (caps)

Teflon and curve heat press and lower plate in silicon rubber.

Size is **15x7 cm** standard (variable size)

- Digital control for timer and temperatures;
- Warning system with acoustic signal;
- Maximum Timer: 999 sec
- Max pression while closed 300 g/cm²
- Pression regulation
- Maximum power consumption: 230 V/1400 W
- Power: 6 A
- Max Temperature: 200°C
